Pff, sounds complicated and fascinating at the same time. Whereas the homepage skip-to-content shortcut linked nicely to a skip-to-content-link-target anchor which then read out the top news story headline the article page skip link was broken. I also used Vocal-Eyes at a Jesuit college and liked it. I've also worked on other. The larger screen naturally allows for a larger keyboard, and I feel like my hands have more room to. And in the hardware arena, some gadgets, such as Dejong's Nokia N82, specialize in helping the blind. Window-eyes, in the other hand, is already a professional screen reader and now that it's almost free windows is getting more attractive and sheap . Beyond that, photo-editing applications such as CameraBag and Tilt-Shift are in mind that "blind" is a range of conditions - there are some who are legally blind that could read a really large monitor or with magnification help, and then there are those who have no vision at all. Dedicated to helping those who are visually impaired pursue their interest in, and study of, music while overcoming the challenges posed by vision loss.
