Once solving problems requires too much perceived sacrifice, the only realistic ways to deal with them are to deny their existence or to blame others for. While the SCF is invaluable, it has its limitations, especially for detecting trends in wealth concentration at the very top.

Over the past five decades, the top 1 percent of American earners have nearly doubled. Nearly half a chapter is devoted to changing the growth rate of health-care spending, which unexpectedly slowed from 7 percent in 2000 to 3 percent in 2010. Finally, the big question is, whether the focus should be on growth or on equality in the future?
