Kolchikian; J. In the sample used by Greenberg et al. ThePGOwavesoftenplaythisroleofbrainstimulation,butnotexclusively. According to them these associations are an additional defense, a disguise against the patient's primitive conflicts, and reveals only what the dreamer consciously feels or thinks about the dream. Considering the methodological limits of the reviewed studies, we note that there is no major argument against Freud's theory of the basic function of dreaming. Thanks for telling us about the problem. AndradeVM.Theneurobiologicaloriginsofpsychoanalyticdreamtheory.Wh there is damage at the higher levels, dreaming is blocked completely, whereas damage at the lower levels merely subtracts something from the terminal stage of the dream process.
