Although areas with high ecosystem functionality index EFI values, but also with high NPP losses, are distributed worldwide, they have been identified mainly in South America, parts of southern Africa, South-East Asia and central Eurasia
Freudenberger et al. Burby RJ.

YourWebbrowserisnotenabledforJavaScript. As evidenced by the above facts, global climate change is not fictional, but rather the cause of the increased frequency of catastrophic phenomena due to human activity. Foresight methodology is an example of a system approach to evaluation of new trends, based on knowledge of environmental, sociological processes and technologies from the perspective of the economy, quality of life and sustainable development Zalewski

ItprovidesaspiritualelementtoNativeAmericanpeoplesinitwatershed, the people who live along Canada's Kluane Lake, it doesn't

matter whether the Slims River was the first or the 10th or the th river to be stolen by climate change.
