We revised the policies in response to several public comments raising concern that the proposed rules about interpreting test results gave too much discretion to adjudicators who may not have the expertise of the test administrators. Attributions of mental illness and judgments about help seeking among Japanese-American and white American students. Absence of longitudinal evidence. The term "normal" is so vague as to be pretty much useless; it can even be misleading when its used as you are using it to mean the same thing as "average. Cobb, Mark R. Jessoped. Batthanyed. Some of the racial and ethnic disparities described in this Supplement are likely the result of racism and discrimination by white clinicians; however, the limited research on this topic suggests that the issue is more complex.
